

Year 7 Maths Visit To The Millennium Park

In May our Year 7 mathematicians paid a visit to the local Millennium Park to explore how maths can be found all around us in an everyday setting.

The students enjoyed using a variety of measuring equipment (trundle wheels, metre rulers, tape measures and magnetic compasses) to help them to think about sizes, shapes and orientation.

This enjoyable visit has helped to consolidate earlier learning over the past two terms. This term the Year 7 students have been focussing on a project to design a new play park based on their own ideas.
